

EVOLUTION™

LCD ELEVATOR AND BUILDING DISPLAYS

EVOLUTION™ LCD DISPLAYS

BENEFITS

- High quality graphics add to the prestige of any building
- Screen content can be tailored to complement the surrounding environment
- Enhanced viewing experience
- Keep building patrons fully informed
- Screens can be branded to suit the building
- Energy efficiency

FEATURES

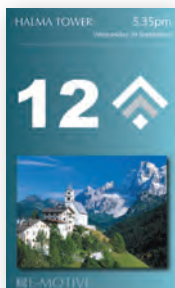

- Full TFT Colour
- Remote updating of screen content
- Long lasting and reliable backlight for long product life
- Horizontal or landscape orientation
- Power-save mode

Full Colour Multimedia LCD Displays

The premium offering for elevator and building displays, the EVOLUTION™ S2 full-colour multimedia displays can provide building patrons with a full colour, multimedia experience. Along with lift direction and status information, these displays will showcase corporate video, tenant advertising content or

promote special events. The S2 can also incorporate a live information feed for up-to-the-minute news and entertainment, and is perfect for use as digital signage within any building. Available in a range of sizes from 10.4" to 42" .

Full Colour Picture LCD displays

A full TFT colour display solution that is ideal for balancing aesthetic appeal with lift information. The EVOLUTION™ S1 can be used for static advertising content and special event promotion along with messaging, elevator destination and

current status indication. Its ultra slim profile means it is ideal for modernisation projects. Available in a range of sizes from 5.7" to 10.4" .

Full Colour Position Indicator LCD Displays

Offering finesse and style, the EVOLUTION™ R1 fully respects its surroundings and blends in effortlessly. A high quality, compact sized full colour display, the R1 is ideal as a position

indicator display solution for residential buildings, both inside the car and on the lift landing. Available in 3.5" and 4.3" format.

EVOLUTION™

LCD ELEVATOR AND BUILDING DISPLAYS

Like the painting on a canvas, deliver your masterpiece on the EVOLUTION™ displays by matching the design to the building's look and feel. Make it as bold and colourful as you like or keep it simple and serene. Play with the infinite possibilities of multimedia. If you want more, more is what you get.

Mix and match multimedia

Captivate your audience with flashy ads and promotions in video or pictures. Keep them abreast of the latest news, weather forecasts and stock movements. Display the building's directory as a static list or one that rolls with the floor numbers. Mix and match to your heart's content. Possibilities increase exponentially with every screen size upgrade. Think "anything" for 42" and beyond.

Management made easy

We understand that the displays will need to be updated with new content from time to time. With EVOLUTION™ LCD screens you maintain full control over display content: remotely manage the displays from one central location in the building; update and upload files easily with E-Motive's Angel™ content management software; or manage changes simply via the USB port.

Enhanced viewing experience

No matter the size, nothing is compromised in the quality of the viewing experience. The 256K colour display delivers vivid and lively images, while the wide viewing angle lets you see clearly

from all sides. Readability is further improved by catering for a character height of at least 40mm complying with the EN81-70 standard.

Hassle-free installation and maintenance

Our commitment to innovation has resulted in technologically advanced yet compact designs that facilitate easy installation and maintenance. With the smallest unit only measuring a tiny 130 x 80 x 23 mm, EVOLUTION™ fits beautifully anywhere, even in the tightest of spaces. Easily extend your reach to a second screen by cloning the first and, equipped with parallel and serial inputs, the need for extra peripheral equipment is kept to a minimum.

Built for robustness and stability

Serving the elevator industry, we make sure that safety is never compromised. This prerequisite dictates that reliability is maximised and that all our products meet industrial standards to perform in heavy-duty environments. All moving parts—more susceptible to breakdown—are replaced by non-moving alternatives. In case of a failure or sudden blackout, the EVOLUTION™ range has a number of auto-recovery and data protection mechanisms on board that keep inconvenience to a minimum.
